No.	Output parameters	Description	Unit
8.2.	• Logging	New logging area currently opened by the community after considering some spatial attributes determining cost-benefit of a plot.	ha
8.3.	• Agriculture-1	New agriculture-1 area currently opened by the community after considering some spatial attributes determining cost-benefit of a plot, where agriculture-1 is user defined.	ha
8.4.	• Agriculture-2	New agriculture-2 area currently opened by the community after considering some spatial attributes determining cost-benefit of a plot, where agriculture-2 is user defined.	ha
8.5.	• Agriculture-3	New agriculture-3 area currently opened by the community after considering some spatial attributes determining cost-benefit of a plot, where agriculture-3 is user defined.	ha
8.6.	• Agriculture-4	New agriculture-4 area currently opened by the community after considering some spatial attributes determining cost-benefit of a plot, where agriculture-4 is user defined.	ha
8.7.	• Agroforestry-1	New agroforestry-1 area currently opened by the community after considering some spatial attributes determining cost-benefit of a plot, where agroforestry-1 is user defined.	ha
8.8.	• Agroforestry-2	New agroforestry-2 area currently opened by the community after considering some spatial attributes determining cost-benefit of a plot, where agroforestry-2 is user defined.	ha
8.9.	• Agroforestry-3	New agroforestry-3 area currently opened by the community after considering some spatial attributes determining cost-benefit of a plot, where agroforestry-3 is user defined.	ha
8.10.	• Agroforestry-4	New agroforestry-4 area currently opened by the community after considering some spatial attributes determining cost-benefit of a plot, where agroforestry-4 is user defined.	ha
9.	**Total attainable yield:**		
9.1.	• NTFP	Total attainable yield of NTFP available in the landscape, where NTFP type is user-defined.	user-defined yield unit
9.2.	• Timber	Total attainable yield of timber available in the landscape (standing stocks).	m^3
9.3.	• Agriculture-1	Total attainable yield of agriculture-1 available in the landscape, where agriculture-1 is user defined.	ton
9.4.	• Agriculture-2	Total attainable yield of agriculture-2 available in the landscape, where agriculture-2 is user defined.	ton
9.5.	• Agriculture-3	Total attainable yield of agriculture-3 available in the landscape, where agriculture-3 is user defined.	ton

No.	Output parameters	Description	Unit
9.6.	• Agriculture-4	Total attainable yield of agriculture-4 available in the landscape, where agriculture-4 is user defined.	ton
9.7.	• Agroforestry-1	Total attainable yield of agroforestry-1 available in the landscape, where agroforestry-1 is user defined.	ton
9.8.	• Agroforestry-2	Total attainable yield of agroforestry-2 available in the landscape, where agroforestry-2 is user defined.	ton
9.9.	• Agroforestry-3	Total attainable yield of agroforestry-3 available in the landscape, where agroforestry-3 is user defined.	ton
9.10.	• Agroforestry-4	Total attainable yield of agroforestry-4 available in the landscape, where agroforestry-4 is user defined.	ton
10.	**Total harvested yield:**		
10.1.	• NTFP	Total harvested yield of NTFP from the landscape, where NTFP type is user-defined.	user-defined yield unit
10.2.	• Timber	Total harvested yield of timber from the landscape (standing stocks).	m^3
10.3.	• Agriculture-1	Total harvested yield of agriculture-1 from the landscape, where agriculture-1 is user defined.	ton
10.4.	• Agriculture-2	Total harvested yield of agriculture-2 from the landscape, where agriculture-2 is user defined.	ton
10.5.	• Agriculture-3	Total harvested yield of agriculture-3 from the landscape, where agriculture-3 is user defined.	ton
10.6.	• Agriculture-4	Total harvested yield of agriculture-4 from the landscape, where agriculture-4 is user defined.	ton
10.7.	• Agroforestry-1	Total harvested yield of agroforestry-1 from the landscape, where agroforestry-1 is user defined.	ton
10.8.	• Agroforestry-2	Total harvested yield of agroforestry-2 from the landscape, where agroforestry-2 is user defined.	ton
10.10.	• Agroforestry-3	Total harvested yield of agroforestry-3 from the landscape, where agroforestry-3 is user defined.	ton
10.10.	• Agroforestry-4	Total harvested yield of agroforestry-4 from the landscape, where agroforestry-4 is user defined.	ton
11.	**Price:**		
11.1.	• NTFP	Current price of NTFP, where NTFP type is user-defined.	currency/user-defined unit
11.2.	• Timber	Current price of timber.	currency/m3
11.3.	• Agriculture-1	Current price of agriculture-1 commodity, where agriculture-1 is user-defined.	currency/ton
11.4.	• Agriculture-2	Current price of agriculture-2 commodity, where agriculture-2 is user-defined.	currency/ton
11.5.	• Agriculture-3	Current price of agriculture-2 commodity, where agriculture-2 is user-defined.	currency/ton
11.6.	• Agriculture-4	Current price of agriculture-2 commodity, where agriculture-2 is user-defined.	currency/ton

No.	Output parameters	Description	Unit
11.7.	• Agroforestry-1	Current price of agroforestry-1 commodity, where agroforestry-1 is user-defined.	currency/ton
11.8.	• Agroforestry-2	Current price of agroforestry-2 commodity, where agroforestry-2 is user-defined.	currency/ton
11.11.	• Agroforestry-3	Current price of agroforestry-2 commodity, where agroforestry-2 is user-defined.	currency/ton
11.10.	• Agroforestry-4	Current price of agroforestry-2 commodity, where agroforestry-2 is user-defined.	currency/ton
12.	**Total non-labor cost:**		
12.1.	• NTFP	Total expenses due to non-labor costs from NTFP harvesting activities, where NTFP type is user-defined.	currency
12.2.	• Logging	Total expenses due to non-labor costs from logging activities.	currency
12.3.	• Agriculture-1	Total expenses due to non-labor costs from agriculture-1 system, where agriculture-1 is user-defined.	currency
12.4.	• Agriculture-2	Total expenses due to non-labor costs from agriculture-2 system, where agriculture-2 is user-defined.	currency
12.5.	• Agriculture-3	Total expenses due to non-labor costs from agriculture-3 system, where agriculture-3 is user-defined.	currency
12.6.	• Agriculture-4	Total expenses due to non-labor costs from agriculture-4 system, where agriculture-4 is user-defined.	currency
12.7.	• Agroforestry-1	Total expenses due to non-labor costs from agroforestry-1 system, where agroforestry-1 is user-defined.	currency
12.8.	• Agroforestry-2	Total expenses due to non-labor costs from agroforestry-2 system, where agroforestry-2 is user-defined.	currency
12.12	• Agroforestry-3	Total expenses due to non-labor costs from agroforestry-3 system, where agroforestry-3 is user-defined.	currency
12.10	• Agroforestry-4	Total expenses due to non-labor costs from agroforestry-4 system, where agroforestry-4 is user-defined.	currency
13.	**Revenue:**		
13.1.	• NTFP	Total revenue gained from NTFP harvesting activities, where NTFP type is user-defined.	currency
13.2.	• Logging	Total revenue gained from logging activities.	currency
13.3.	• Agriculture-1	Total revenue gained from agriculture-1 system, where agriculture-1 is user-defined.	currency
13.4.	• Agriculture-2	Total revenue gained from agriculture-2 system, where agriculture-2 is user-defined.	currency
13.5.	• Agriculture-3	Total revenue gained from agriculture-3 system, where agriculture-3 is user-defined.	currency
13.6.	• Agriculture-4	Total revenue gained from agriculture-4 system, where agriculture-4 is user-defined.	currency
